## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims 3, 6 – 8, 15 and 17 – 20 are drawn to an invention nonelected with traverse in the reply filed on August 18, 2008. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1 and 13 – 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leise, Jr. (US 5,401,264) in view of EP 1 254 647

With respect to claims 1 and 13 – 14, Leise, Jr. (hereinafter "Leise") discloses an ostomy appliance comprising a bag having a front and rear wall with an opening disposed therein (figure 1), and an adhesive wafer (col. 2, line 67 to col. 3, line 3)

having a hole alignable with the opening (figure 1), and including a first and second side wherein the second side includes first and second portions (figures 1 - 5) and an adhesive layer (col. 3, line 10) positioned to selectively secure the second portion of the wafer to the rear wall.

The difference between Leise and claim 1 is the provision that the second portion is unattached to the rear wall of the bag and that the adhesive layer includes a release liner.

Leise discloses that the attachment of the wafer to the edge of the rear wall may include resealable coupling means as set forth in col. 3, lines 7 - 14. In this case, the second portion may be selectively secured, permanently secured and/or unattached to the rear wall.

EP 1 254 647 (hereinafter '647) provides an ostomy appliance with a release liner covering the adhesive layer as set forth in the abstract.

It would have been obvious to one of ordinary skill in the art to provide the adhesive layer of Leise with a release liner because the use of such protects the adhesive surface prior to use as taught by '647 in col. 3, lines 4 - 6.

Claims 4 - 5, 9 - 10 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leise, Jr. (US 5,401,264) in view of Thomas (4,865,594)

The difference between Leise and claim 4 is the provision that the ostomy appliance comprises a stiffening element.

Thomas provides the ostomy appliance with a stiffening element to which first and second parts of the bag are secured as set forth in col. 3, lines 23 - 41.

It would have been obvious to one of ordinary skill in the art to provide the ostomy appliance of Leise with a stiffening element as taught by Thomas because the use of such facilitates adhesion and/or reduces skin irritation as taught by Thomas in col. 3, lines 16 – 41.

With reference to claims 5 and 9 – 10, see col. 3, lines 16 – 41 and figure 3 of Thomas.

With respect to claim 16, see the rejection of claim 4.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1, 4 – 5, 9 – 10, 13 – 14 and 16 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**.

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3761

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
